★ For the Nerds ★

Tequila knowledge and appreciation has come a long way since the days of daring your friends to eat the worm at the bottom of the bottle, when overconsumption of cheap product was synonymous with “tequila.”

Well made tequila is a time consuming process that involves four primary steps - cultivation and harvesting, roasting of the agave, fermenting the expressed juice, and distillation. In general, a better product is made using agaves that were allowed to fully mature, roasted in a traditional manner, fermented over a period of many days, and double distilled. This creates a finished spirit that has an immense variety of possible flavor profiles that is complex, delicious, and stands on its own.

In contrast there are many brands made using a chemical process that is rushed and finished in a matter of a few days, using prematurely harvested plants. The finished product is consequently not very good, and to compensate it is common to add artificial sweeteners, and one or more of thousands of possible synthetic flavorings.

Creating quality, traditionally produced tequila is an intentional process that takes years, or generations, of expertise. We now proudly offer one of the largest selections of certified additive-free tequilas in Washington. This is important in an industry in which a majority of products for sale contain undisclosed ingredients like vanilla extract, aspartame, caramel coloring, or glycerin.

The world of agave is a fascinating and ever expanding realm of history, culture, art, science, and even politics. For more information, we encourage you to check out the following excellent resources:

★ A Field Guide to Agave, by Clayton Szczech

★ Agave Spirits, the past, present and future of Mezcal, by David Suro Piñera & Gary Paul Nabhan

★ Website/mobile app: tequilamatchmaker.com

And stay tuned for upcoming special events such as tastings, and even opportunities to take a private tour in the heart of Jalisco, where the magic happens.
